Navigation from the 2005 Edition process diagrams.

The familiar Community Edition File Manager has had a face lift and been enhanced to include sign out to email, tracking of user against files and sign out whole documents in one step.

An improved index and a new full document search tool will

Professional Edition

A step change in PRINCE2™ Project Management tools

The new Professional Edition makes **PROJECT in a box** a practical solutior of organisations. Many hundreds and thousands of people have been using **PR** a local/personal project management system or PSO and have been asking us f documents and apply structured management techniques across their project t that is what we have produced in the Professional Edition with the following key

- Networked via web services to share access to project dc information securely over a local network or even the int
- Activated system security and user based permissions.
- Advanced Risk, Issue and Quality logs.
- Management and reporting tools.
- Project status tracking tools.
- Improved document tracking.
- Multiple project templates.
- Email integration.

This is all available for a Professional licence price of £50 for your first licence, r priced enterprise project management system available. What's more you won' priced licence for everyone that needs to use it, as is the case with many proje because we are also introducing a Team Edition licence which will provide all th for Project team members.

Benefits

Professional Edition delivers the core **PROJECT in a box** benefits by helpir delivery of projects by the traditional measures of time, cost and quality.
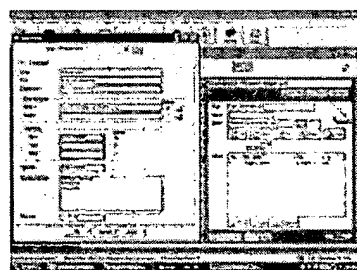

Today though with projects being the way that most organisations deliver their particular with the accelerating adoption of projects as a way of business for SN industry, additional benfits are essential. Professional Edition has been develop mind and will also provide you with:

- **Low adoption/implementation threshold** - a system to implement, that can be populated using your existing documentation and will be available for your project tean
- **Scaleable and flexible system** - Suitable for one to tei

save time and energy finding what you need in your current and old projects.

The reporting wizard allows you to choose which standard sections are to be included in your reports, including risks, issues and quality auto extracted from the logs and a system report on user activity.

Integration with Outlook enables you to send emails directly from the system and to sign documents out to this route. Team management tools enable you to message and communicate with your colleagues more effectively.

Export has been improved to

or users and beyond. You can also evolve your approach projects, even mid project, if required.

- **Organisational learning** - Built closely around PRINCE: OGC's Process maps, template documents and glossary i methodology is reinforced on the job.
- **Good Team Communications** - A common underlying i failure is poor communications so we have provided a ra! communications tools including message boards and eme
- **User centric benefits** - although built around a strong | when the user is in the system it feels like the system su and not the otherway around. It has become common fo! become the centre of the business activity and the PM ca just feeding the system, leading to low motivation, not w **box**.

Features

The comparison matrix provides an overview of the features delivered by the P! section below addresses some of these in more detail.

- **PRINCE2™ structure** - You navigate your project using diagrams so familiar from the manual. Once at the requii system will show you which documents and files you sho reviewing or completing there.
- **Full document and file management** - View, sign in a files or whole documents using the very intuitive file expl user made what changes to each document or who has t present.
- **Network capability** - The single biggest thing our Comi users have asked about is the ability to share their docur colleagues across their network. Professional Edition doe: one stage further. Because we use webservices to comm your client interface and the server this can also operate enabling you to share your documents (under permissior other partners, stakeholders and customers. This system the latest SSL standards which encrypts all the informati(transferred making this a highly secure method of comm take advantage of this you will require a security certifice provided as standard.
- **Audit trail** - View and report on the audit trail for docurr can see who did what and view the historic copies of the question.
- **Permissions based** - Individual users can be given diffe levels on each project enabling the PM to retain full contr activities.
- **Manage your whole project** - So many PM systems ar(manage the project but the 'doing' of the project is achie traditionally. Not with Professional Edition, the enhanced section lets you create, or set up a template for, your re(structure outside the management products and manage same interface, subject to the same permissions, search
- **Powerful searching** - You can quickly find any documei including old versions which contain your search phrase (

provide a full history of your project, this new project exchange format also enables you to upload your existing projects from Community Edition.

Advanced new risk, quality and Issue logs built in Excel give you the best of both worlds, freedom to distribute and manage in a way you are used to and PROJECT in a box version control.

Each of the threeadvanced logs produce their own statistical summary which can be viewed within the log or automatically extracted for use in the management reports..

quickly track down issues and learn from previous projec

- **Document ID Tracking** - If you use MS2000 or newer \ system will insert into the document properties a unique file you are using. If you show these in the header it will your hard copies version control auditable.
- **Email Integration** - Users with Outlook 2003 or newer ' out or view documents directly to email and send to colle simple step. Email is also very important for team comm user can send out team bulletins or contact individuals w directly from the system.
- **Enhanced Logs** - The risk, issue and quality logs have t enhanced to provide much improved control of the projec delivered as Excel templates enabling them to be circulat project document. If these logs are used the reporting er key data from them and include this in your project repo best of both worlds, an integrated approach to reporting operation.
- **Project status** - High permission level users can now us system to provide some basic information on the status (which can be viewed by any user with access to that proj used in Management reports produced by the system.
- **Reporting** - Users with a full professional edition licence produce a range of management reports presenting prog project and stages, document and user based reports on consistency of the reports will enable organisations to co the relative performance on different projects if this is re
- **System Administration** - Users with a full professional to administer the projects and user accounts in all the wé expect. The add new project control now enables the adr from multiple project templates meaning that you can st(refinements to PRINCE2™ for example having a basic ap| projects and a full implementation template for high risk/

Deployment

As you might expect we have made sure that deploying Professional Edition is é requires the minimum of technical understanding.

You will need the following to operate all the functionality of Professional editior

- All computers with the server or client installed will requi framework installed, this is free and full details are provi(guide and help.
- For the server - a computer operating IIS and Windows I (W2k professional, XP professional or any windows serve beyond W2k).
- For the server - a Microsoft SQL2000 or newer database, SQL licences we provide the free Microsoft MSDE version keeping your system implementation costs low.
- For the client PC - a computer operating any windows plé newer.
- To use the email capabilities the client PC must have Out newer installed.

- To use the Document ID tracking and advanced Log capa
  PC must have word and Excel 2003 or newer installed.
- To operate the encrypted transfer of documents the user
  security certificate which will need to be installed at both
  client ends.
- As the client is by definition 'thin' its resource requireme
  meaning that minimum hardware requirements are not r

The 'server' can be operated from a desktop PC/laptop or a more conventional :
the needs of the project/organisation, the number of users and storage capacit\
are no system imposed limits on the number of clients that can connect to the :
organisations can operate multiple 'servers' to build a network or web architecti
different servers for different projects.

The Professional edition is available in two variants. The full Professional Editior
functionality set including admin tools and a server licence. The Team edition is
high end functionality and admin tools and does not come with a server licence
the typical team member who uses the system without configuring it. Further d
functionality split can be found in the product comparison matrix.

Users can install the software themselves at both the server and client ends usi
exe, we provide email support for installation within the purchase price. Our ob;
system that you can install, set up and operate without any need for implement
PROJECT in a box or our partners. However, if you do feel more comforta
install, want help tailoring templates to match your standard projects or addres
associated with implementation we can provide this implementation assistance.
